

Global BBA emlyon business school

A few tips before the test...

- Find a quiet place to sit with your computer and make sure you will not be disturbed during an hour
- You will be able to check with our online system if the frame/image and sound are ok
- You will start with a neutral test question to get familiar with the process before the official test starts
- In case of a technical issue, a hotline will contact you
- You will have to provide real time answers and get no time to prepare. Of course, questions are random and will change from an applicant to another.
- Between several questions you will have some opportunity to make a break. Once a question is launched there is no way to stop or record it again. Time will be limited.
- The video recording will be used for emlyon business school application system only and never communicated for another purpose. Once the programme will have started, the material will be destroyed. You will be asked to testify about your identity and upload a recent picture of yourself.
